

Technical data

Feature	
Tanks	2
Fish per tank	12
Infection studies	no
Environmental control	yes
Data-enabled	no

Observations and measurements
Routine
Body weights
Mortality
Stunning parameters
EEG analysis
ECG analysis
Specialist
Behaviour during electrical stunning
Microbiology
Immunology
Pain assessment using EEG/behaviour
Carcass analysis (including MRI)
Post mortem

Active Bristol Research areas:

- Humane electrical stunning
- Response to anaesthetics
- ECG and brain activity
- Fin damage
